

SYSTEM CONTROLLER AND METHOD FOR MONITORING
AND CONTROLLING A PLURALITY OF GENERATOR SETS

ABSTRACT OF THE DISCLOSURE

- 5 In accordance with the present invention, a system controller and method for monitoring and controlling a plurality of generator sets are provided. Each generator set generates electrical power and includes a generator communications link for connecting a generator set to a network. A user interface allows a user to select a generator set and set values for various predetermined operating parameters of the selected generator sets. Thereafter, a communications link connectable to the network transmits the user set
- 10 values of the predetermined operating parameters to the selected generator set.
